ABOUT **COMPANY**

Green Span Trading & Contracting is a dynamic and rapidly growing organization based in Muscat, Sultanate of Oman. Established with a vision to contribute meaningfully to Oman's development landscape, we have evolved from our beginnings as Romantic Lines Trading (est. 2022) into a comprehensive contracting and trading powerhouse.

In 2025, we rebranded to Green Span to better reflect our expanded capabilities and sustainable vision. Our name symbolizes our commitment to enduring ("Span") projects and a forward-thinking ("Green") approach that prioritizes quality, efficiency, and environmental consciousness.

"Building with Integrity, Spanning Generations."

OUR JOURNEY

2022 | The Foundation: Romantic Lines Trading

- The company's journey began in 2022 with the establishment of Romantic Lines Trading, an organization founded on the core principles of reliability, transparency, and operational integrity within the Omani market. During this foundational phase, the company focused on building a robust reputation through strategic trading operations, specializing in the sourcing and supply of high-quality industrial materials. By prioritizing client trust and developing a sophisticated logistics network, we laid the essential groundwork required to support the Sultanate's growing industrial needs. This period was defined by an unwavering commitment to quality standards, which allowed us to cultivate deep-rooted relationships with local partners and establish a solid platform for future diversification.

OUR JOURNEY

2025 | The Transformation: Green Span Trading & Contracting

- In 2025, the organization reached a pivotal milestone by undergoing a strategic rebranding and structural evolution to emerge as Green Span Trading & Contracting. This transformation reflected a significant expansion of our capabilities, pivoting from a dedicated trading firm into a comprehensive, multi-disciplinary contracting powerhouse. The "Green Span" identity was intentionally chosen to symbolize our new focus: "Green" representing our dedication to eco-conscious building and sustainable innovation, and "Span" signifying the structural longevity and enduring value of our projects. This shift aligned our corporate identity with an integrated service portfolio—encompassing building construction, road infrastructure, and specialized steel fabrication—designed to meet the complex development goals of Long Term vision through superior craftsmanship and a forward-thinking, sustainable approach.

MD

MESSAGE

It is with immense pride and a profound sense of responsibility that I welcome you to Green Span Trading & Contracting.

Our journey began in 2022 under the name Romantic Lines Trading, founded on a simple principle: to build a business rooted in trust, reliability, and tangible value for our clients. That foundation of integrity served us well, allowing us to grow, learn, and understand the evolving needs of Oman's dynamic market.

The decision to rebrand to Green Span in 2025 was a strategic and symbolic leap. It represents our significant evolution from a trading entity into a full-fledged, multi-disciplinary contracting company. "Green" signifies our commitment to fresh ideas, sustainable growth, and a forward-thinking approach in every project we undertake. "Span" reflects our ambition to build lasting structures, forge enduring partnerships, and contribute to the long-term development of our beloved nation.

Today, Green Span stands as a testament to our team's dedication, skill, and hard work. From constructing vital buildings and roads, to the precise craftsmanship of our welding workshop, to the reliable supply of quality materials through our trading division, we are united by a shared mission: to deliver excellence without compromise.

Our success is—and will always be—a direct result of the trust you place in us. We do not take this partnership lightly. Every project is an opportunity for us to demonstrate our commitment to quality, safety, and on-time delivery.

As we look to the future, our vision is clear: to be a trusted name synonymous with quality and innovation in Oman's construction landscape. We are energized by the challenge and deeply honored to play a role in shaping the nation's infrastructure.

Thank you for being part of our story. We look forward to building a stronger, more prosperous future together.

Farhan Shah
Owner & Managing Director
Green Span Trading

OUR VISION

To be recognized as the most reliable strategic partner in Oman's infrastructure development, renowned for our agile response to complex construction challenges and our premium trading standards. We aim to foster a culture of excellence that empowers our community and protects our environment, ensuring that Green Span Trading & Contracting remains at the forefront of the nation's 2040 vision through superior craftsmanship, ethical business practices, and a commitment to building a sustainable future, one span at a time.

Beyond mere project completion, we envision a future where Green Span serves as a catalyst for national progress by integrating cutting-edge engineering with the traditional values of Omani craftsmanship. We aspire to redefine the benchmarks of the contracting sector by consistently delivering infrastructure that is not only structurally superior but also socially responsible and ecologically restorative. By investing in the continuous development of our local workforce and adopting innovative, low-carbon building technologies, we strive to bridge the gap between industrial necessity and environmental preservation. Our ultimate goal is to leave a legacy of "spanning" excellence—creating robust, enduring structures that foster economic growth.

OUR **MISSION**

To deliver superior construction and trading solutions through an unwavering commitment to quality, innovation, and client satisfaction, thereby playing a key role in Oman's infrastructural development while operating with ethical and sustainable practices.

Our mission is centered on the principle of "Total Project Integrity." We strive to bridge the gap between complex architectural concepts and tangible, durable reality by leveraging our dual expertise in material trading and advanced contracting. We are dedicated to providing our clients with a seamless, end-to-end experience that eliminates inefficiency and prioritizes structural excellence. By sourcing only the highest-grade materials through our trading division and employing certified professionals in our construction and welding sectors, we ensure that every project—whether a residential build or a national roadway—is executed with precision and long-term viability.

Furthermore, we are committed to being a proactive contributor to the Sultanate's socio-economic landscape. This involves not only adhering to the highest safety and ethical standards but also actively seeking out "green-forward" methodologies that protect Oman's unique environment.

SAFETY & QUALITY MANAGEMENT PLAN(SQMP)

GREEN SPAN TRADING & CONTRACTING

1. INTRODUCTION

This Safety & Quality Management Plan (SQMP) defines the systems, procedures, responsibilities, and controls adopted by Green Span Trading & Contracting to ensure that all works are executed safely, to the required quality, and in full compliance with: - Laws and regulations of the Sultanate of Oman - Client and project specifications - Applicable international standards and best practices This plan applies to all employees, subcontractors, suppliers, and visitors engaged in company activities

2. OBJECTIVES

2.1 Safety Objectives

- Achieve zero fatalities and zero major accidents
- Prevent occupational injuries and illnesses
- Provide a safe and healthy working environment
- Promote a strong safety culture at all levels

2.2 Quality Objectives

- Deliver works that meet or exceed contractual requirements
- Prevent defects, rework, and non-conformities
- Ensure consistency and continuous improvement in quality performance
- Achieve client satisfaction

3. MANAGEMENT COMMITMENT

Top management of Green Span Trading & Contracting commits to: - Provide adequate resources for safety and quality management - Ensure compliance with this SQMP at all project sites - Promote leadership, accountability, and continual improvement - Stop any unsafe or non-conforming work immediately Safety and quality shall never be compromised for cost or schedule.

4. ORGANIZATION & RESPONSIBILITIES

4.1 Managing Director / General Manager

- Overall responsibility for Safety & Quality performance
- Approval of policies, plans, and procedures

SAFETY & QUALITY MANAGEMENT PLAN(SQMP)

GREEN SPAN TRADING & CONTRACTING

4.2 Project Manager

- Implementation of SQMP at project level
- Coordination with client and consultant
- Ensure availability of competent staff and resources

4.3 HSE Officer

- Monitor safety performance and site compliance
- Conduct inspections, audits, and toolbox talks
- Investigate incidents and recommend corrective actions

4.4 QA/QC Engineer

- Implement Quality Management procedures
- Prepare and maintain Inspection & Test Plans (ITP)
- Ensure compliance with drawings, specifications, and standards

4.5 Supervisors / Foremen

- Direct supervision of work activities
- Ensure safety rules and quality procedures are followed
- Report hazards, incidents, and non-conformities

4.6 Workers

- Follow safety instructions and quality requirements
- Use PPE and tools correctly
- Report unsafe acts and defects

5. SAFETY MANAGEMENT PLAN

5.1 Hazard Identification & Risk Assessment

- Identify hazards before starting any activity
- Prepare Risk Assessments and Method Statements (RAMS)
- Apply hierarchy of controls (elimination, substitution, engineering, administrative, PPE)

SAFETY & QUALITY MANAGEMENT PLAN(SQMP)

GREEN SPAN TRADING & CONTRACTING

5.2 Permit to Work System

- Permits shall be implemented for: - Hot works - Confined space entry - Excavation works - Working at height

5.3 Training & Competency

- Site HSE induction for all personnel
- Job-specific training and certification
- Regular toolbox talks

5.4 Personal Protective Equipment (PPE)

- Mandatory PPE includes: - Safety helmet - Safety shoes - High-visibility vest - Gloves and eye protection (as applicable)

5.5 Emergency Preparedness

- Emergency response plan for fire, accident, spill
- First aid facilities and trained first aiders
- Emergency drills conducted periodically

5.6 Incident Reporting & Investigation

- Immediate reporting of incidents and near misses
- Root cause analysis
- Implementation of corrective and preventive actions

6. QUALITY MANAGEMENT PLAN

6.1 Quality Control System

- Works executed as per approved drawings and specifications
- Inspection and testing at defined stages
- Quality records maintained and submitted

6.2 Inspection & Test Plans (ITP)

- IITPs shall be prepared and approved for: - Rock soiling works - Riprap works - Reinforcement fixing

SAFETY & QUALITY MANAGEMENT PLAN(SQMP)

GREEN SPAN TRADING & CONTRACTING

6.3 Material Control

- Materials procured from approved sources
- Material inspection upon delivery
- Proper storage and handling

6.4 Non-Conformance Control

- Identification of Non-Conformance Reports (NCR)
- Corrective and preventive actions
- Follow-up and closure of NCRs

6.5 Document & Record Control

- Controlled issue of drawings and documents
- Maintenance of quality and safety records
- Proper filing and traceability

7. SUBCONTRACTOR MANAGEMENT

- Subcontractors must comply with this SQMP
- Submission of HSE plans, RAMS, and ITPs
- Continuous monitoring of performance

8. MONITORING, AUDIT & REVIEW

- Regular site inspections and audits
- Monitoring of safety and quality KPIs
- Management review meetings .
- Continuous improvement initiatives

SAFETY & QUALITY MANAGEMENT PLAN(SQMP)

GREEN SPAN TRADING & CONTRACTING

9. COMMUNICATION & CONSULTATION

- Safety and quality meetings
- Toolbox talks and briefings
- Display of policies and procedures at site

10. DISCIPLINARY ACTION

- Failure to comply with safety or quality requirements may result in disciplinary action, including removal from site

11. CONCLUSION

- Green Span Trading & Contracting is committed to implementing this Safety & Quality Management Plan to ensure safe operations, high-quality workmanship, and full compliance with legal and contractual obligations.

1. POLICY STATEMENT

- Green Span Trading & Contracting is fully committed to conducting all its business activities in a manner that protects the health and safety of its employees, subcontractors, clients, visitors, and the public, while also preventing damage to the environment. The management of Green Span Trading & Contracting recognizes that all accidents, occupational illnesses, and environmental incidents are preventable, and therefore commits to providing a safe and healthy working environment in compliance with: - Laws and regulations of the Sultanate of Oman - Applicable client and project HSE requirements - Relevant international standards and industry best practices Health, Safety, and Environmental protection is a core value of the company and takes priority over cost, productivity, and schedule.

2. HSE OBJECTIVES

- The objectives of this HSE Policy are to: - Prevent injuries, occupational illnesses, and fatalities - Protect the environment from pollution and damage - Ensure compliance with all applicable legal and contractual HSE requirements - Promote a strong HSE culture through training and awareness - Continually improve HSE performance through monitoring and review

3. MANAGEMENT COMMITMENT

- Top management of Green Span Trading & Contracting commits to: - Provide safe systems of work, safe equipment, and competent supervision - Allocate adequate resources for effective HSE management - Ensure that HSE responsibilities are clearly defined and communicated - Stop any work that is considered unsafe - Lead by example and demonstrate visible HSE leadership Management shall regularly review HSE performance and take corrective actions where necessary

4. LEGAL AND OTHER REQUIREMENTS

- Green Span Trading & Contracting shall: - Comply with all applicable Omani Labor Law, Ministry of Labour regulations, and Royal Decrees - Follow client, consultant, and project-specific HSE requirements - Maintain valid permits, licenses, and approvals as required - Ensure subcontractors comply with the same HSE standards

5. ROLES AND RESPONSIBILITIES

5.1 Managing Director / General Manager

- Overall responsibility for HSE performance
- Ensure implementation of this HSE Policy
- Provide adequate resources and authority for HSE management

5.2 Project Manager / Site Manager

- Implement HSE requirements at project sites
- Ensure risk assessments and method statements are prepared and followed
- Enforce site safety rules and procedures ☒ Report incidents and take corrective actions

5.3 HSE Officer / Supervisor

- Monitor day-to-day HSE activities on site
- Conduct site inspections, audits, and toolbox talks
- Identify hazards and recommend control measures
- Investigate incidents and near misses

5.4 Employees and Workers

- Follow all HSE rules and instructions
- Use personal protective equipment (PPE) correctly
- Report unsafe conditions, acts, and incidents immediately
- Take care of their own safety and that of others

6. HAZARD IDENTIFICATION AND RISK ASSESSMENT

- The company shall: - Identify workplace hazards before starting any activity - Conduct Risk Assessments and prepare Method Statements (RAMS) - Implement control measures using the hierarchy of controls - Review risk assessments whenever there is a change in scope or method

7. TRAINING AND COMPETENCY

- Green Span Trading & Contracting shall ensure that: - All employees receive HSE induction before starting work - Job-specific and task-specific training is provided - Toolbox talks are conducted regularly - Operators of machinery and equipment are trained and certified

8. PERSONAL PROTECTIVE EQUIPMENT (PPE)

- The company shall: - Provide suitable PPE at no cost to employees - Ensure PPE is appropriate for the task and hazards involved - Enforce mandatory use of PPE on all sites Minimum PPE includes safety helmet, safety shoes, high-visibility vest, gloves, and eye protection, as applicable.

9. EMERGENCY PREPAREDNESS AND RESPONSE

- The company shall: - Identify potential emergency situations (fire, accident, spill, etc.) - Establish emergency response procedures - Provide first aid facilities and trained first aiders - Conduct emergency drills as required

10. INCIDENT REPORTING AND INVESTIGATION

- All incidents, accidents, near misses, and unsafe acts shall be: - Reported immediately to site management - Investigated to identify root causes - Corrective and preventive actions shall be implemented

11. ENVIRONMENTAL PROTECTION

- Green Span Trading & Contracting commits to: - Prevent pollution and minimize environmental impact - Manage waste responsibly and promote recycling - Control dust, noise, and emissions - Protect soil, water, and natural resources

12. SUBCONTRACTOR AND SUPPLIER MANAGEMENT

- All subcontractors and suppliers shall: - Comply with this HSE Policy - Submit HSE plans, risk assessments, and method statements as required - Be monitored for HSE performance

HEALTH, SAFETY & ENVIRONMENT (HSE) POLICY
GREEN SPAN TRADING & CONTRACTING

13. MONITORING, AUDIT AND REVIEW

- The company shall: - Conduct regular HSE inspections and audits - Monitor HSE performance indicators - Review this policy periodically to ensure its effectiveness

14. DISCIPLINARY ACTION

- Failure to comply with HSE requirements may result in disciplinary action, including removal from site.

15. COMMUNICATION

- This HSE Policy shall be: - Communicated to all employees and subcontractors - Displayed at all project sites and offices - Made available to interested parties upon request

16. POLICY APPROVAL

- This HSE Policy is approved by the management of Green Span Trading & Contracting and is effective from the date below.

OUR SERVICES

What We Do

We offer an integrated suite of services designed for seamless project execution:

1. Building Construction
2. Road Construction & Infrastructure
3. Specialised Welding Workshop
4. Trading Division

BUILDING CONSTRUCTION

- Residential, commercial, and industrial construction.
- Project management from concept to completion.
- Emphasis on quality materials, modern techniques, and adherence to timelines and international safety standards.

ROAD CONSTRUCTION & INFRASTRUCTURE

- Construction and maintenance of roads, walkways, and associated infrastructure.
- Site preparation, grading, and asphalt works.
- Commitment to creating durable and safe transportation networks.

SPECIALISED WELDING WORKSHOP

- Fabrication of structural steel, gates, fences, and custom metal works.
- Industrial piping and support structures.
- Maintenance, repair, and on-site welding services manned by certified professionals.

TRADING DIVISION

- Supply of high-quality construction materials (steel, cement, aggregates, etc.).
- Distribution of tools, equipment, and hardware for the construction industry.
- Sourcing and supplying specialised products as per project requirements.

OMAN MARKET

SCOPE

Alignment with Oman Vision 2040

The single greatest driver for your business scope is Oman Vision 2040. This national strategy places significant emphasis on economic diversification, infrastructure development, and sustainable growth.

Infrastructure & Roads: As Oman builds new cities, expands ports (like Duqm and Salalah), and connects regions, the demand for Road Construction & Infrastructure—a core service for Green Span—will remain sophisticated and consistent.

Urban Development: Vision 2040 involves constructing tourism hubs, industrial zones, and residential complexes, directly expanding the scope for your Building Construction division across residential, commercial, and industrial sectors.

The "Green" Construction Imperative

Your re-branding to "Green Span" in 2025 was highly strategic. The Oman government and major private developers are increasingly prioritizing sustainability and eco-friendly building practices.

- There is a significant and growing market niche for contractors who can deliver LEED-certified buildings, use sustainable materials, and implement energy-efficient construction processes. Your "green-forward" vision positions you perfectly to capture this high-value segment.

Public-Private Partnerships (PPP)

Oman is increasingly utilizing Public-Private Partnerships to fund and execute large infrastructure projects. As a reliable, integrated, and "green-focused" local player, Green Span is well-positioned to participate in these PPP models, partnering with the government on long-term nation-building projects.

OMAN MARKET

SCOPE

Leveraging the Integrated Business Model

Your unique strength lies in being both a Trading Powerhouse and a Comprehensive Contractor. This creates a formidable competitive advantage in the Omani market:

- **Supply Chain Certainty:** While other contractors struggle with material shortages or price fluctuations, your Trading Division (supplying steel, cement, aggregates, and tools) ensures your construction projects have reliable, cost-effective, and timely access to materials.
- **Cost Competitiveness:** By eliminating middlemen for key materials, you can offer more competitive pricing on tender bids for construction and road projects without sacrificing your margins.

Specialized Niche & Maintenance Markets

Beyond large-scale construction, there is significant scope in specialized and ongoing services:

- **Specialized Welding:** As Oman's industrial and oil & gas sectors expand, the demand for high-quality, certified fabrication of structural steel, piping, and custom metal works (your specialized welding workshop) is crucial.
- **Maintenance & Renovation:** With aging infrastructure and a growing building stock, the market for maintenance, refurbishment, and "green" retrofitting is a reliable and steady revenue stream that complements your primary construction activities.

SUMMARY OF **SCOPE**

Business Division	Primary Market Drivers in Oman	Scope Outlook
Building Construction	Urban expansion, tourism development, industrial zones.	High Growth
Roads & Infrastructure	Regional connectivity, new city development, port expansions.	High & Steady
Trading & Supply Chain	Serving internal projects & external market demand for quality materials.	Very High (Value-Add)
Specialized Welding	Industrial growth, custom fabrication, oil & gas support.	Niche Growth
